TRAINING

Accounting informatics
O.L.V Ten Doorn, Eeklo Belgium 2018-2020 (5de -6de secondary)
In my last two years of secondary school, I chose to study accountancy and computer science. I got a mix of accounting and economics together with computer science. In computer science, we learned to program in C# and to make websites with HTML and CSS.
Applied computer science - ERP (Enterprise Resource Planning)
Hogent Ghent Belgium
Sept. 2020 - present
In my training I learn to work with SAP and to set up a project for a customer by first making an analysis and then developing it.

REALISATION

In the second year of my studies, I had to make a web application in a group. We got a customer who had a vision and we started developing that vision using use cases, wireframes and mock-ups. Once we were on the same wavelength as the customer, we could start building the backend and frontend (Sapgui5) using SAP.

QUALITIES

I like talking to people, so I will spend a lot of time making sure I don't have any misunderstandings with anyone.

I can work in a group, because communication is very important to me.

IT SKILLS

Java	Good
SQL	Good
PythonModerate	

TALEN

English	C1
FransB1	
Dutch	Native language
